**KILLS RATS & MICE**

Kills Warfarin Resistant Norway Rats

Norway rats, roof rats, and house mice may consume a lethal dose in one night's feeding with first dead rodents appearing four or five days after feeding begins.

**ACTIVE INGREDIENT:**
Bromadiolone (CAS #98772-66-7) 0.005%

**OTHER INGREDIENTS:**
Contains Denatonium Benzoate

TOTAL: 100.00%

**DERNOCIDE PLACE PAC**

**RODENTICIDE PLACE PACS**

**RODENTICIDE READY-TO-USE PLACE PACS**

**Kills Rats & Mice**

Norway rats, roof rats, and house mice may consume a lethal dose in one night's feeding with first dead rodents appearing four or five days after feeding begins.

**USE RESTRICTIONS:**
This product can only be used to control Norway rats, roof rats and house mice in homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, main reservoirs, agricultural and public buildings, transport vehicle (ships, trains, aircraft), dock and port of terminals and related structures associated with and painted with these sites. Fence and perimeter baiting, located 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.

**KEEP OUT OF REACH OF CHILDREN CAUTION**

See back panels for First Aid and additional precautionary statements.

**SAFETY DATA SHEET**

**NOTICE TO VETERINARIAN**

**NOTE TO PHYSICIAN**

**NOTE TO PHYSICIAN**

**FIRST AID**

**IF SWALLOWED:**• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Call a poison control center, or doctor, or 1-877-854-2494, or 1-800-858-7378 ** immediately for treatment advice.

**IF IN EYES:**• Hold eye open and rinse slowly and gently with water for 15-20 minutes.

**FOR ANIMALS INGESTING BAIT AND/OR SHOWING POISONING SIGNS (BLEEDING OR EXHIBIT OF SYMPTOMS OF ANY KIND):**

• Call a poison control center, or doctor, or 1-877-854-2494, or 1-800-858-7378 ** immediately for treatment advice.

**WARRANTY:** To the extent consistent with applicable law, Bell makes no warranty, expressed or implied, with respect to the absence of injury or damage, including, without limitation, injury or damage to human beings, to property or the environment, whether caused by negligence or otherwise, of any nature, or from any cause, including, but not limited to, any defect in design, manufacture or condition of the product involved in the accident. Warranties, express or implied, including warranties of merchantability and fitness for a particular purpose, are disclaimed by Bell to the extent of the law. The sole remedy available to the buyer shall be for Bell to replace the product at Bell's option. Bell shall not be liable for any incidental, indirect, special, punitive, or consequential damages, including, but not limited to, loss of profits, or downtime or loss of production due to any defect in the product or its use.

**CAUTION:**

This product is extremely toxic to mammals and birds. Dogs, cats and other predators and scavenging mammals and birds might be poisoned if they ingest any animal that has eaten this bait. This product is not a lure for bait, so do not apply this product to lures or to areas where water surface is present or to structural areas below the mean high water mark. Rainfall after application may wash organophosphate in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinse water.

STOP RODENT DAMAGE NOW.

#1 RODENTICIDE

KILLS WARFARIN-RESISTANT NORWAY RATS

EASY TO USE, EASY TO UNDERSTAND DIRECTIONS FOR USE

1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be reached by dogs or by children under six years of age, bait stations must be modified or replaced.
3. Dispose of product container and unused, discarded, or contaminated bait as specified on the label.

NOTE: Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used at all sites, pets, non-target mammals, or birds may access the bait.

USE RESTRICTIONS:
This product can only be used to control Norway rats, roof rats and house mice in and within 100 ft of man-made structures constructed in a manner so as to make vulnerable to conventional rodenticide baits and/or to harboring or affecting rodent infestations. Examples of such structures include: homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, livestock, feed and tobacco processing facilities, transport vehicles (ships, trains, aircraft), docks and ports of commerce, buildings and related structures associated with these areas. Fence and perimeter baiting, located 10 ft from a structure as defined above, is prohibited.

PRECAUTIONARY STATEMENTS

CAUTION:
Keep out of reach of children and pets.

**OTHER INGREDIENTS:**

- 99.995% NET WT:
- *Contains Denatonium Benzoate*
- TOT AL:             100.000%

**ACTIVE INGREDIENT:**

- Bromadiolone

**DIRECTIONS FOR USE**

- Place 1 Place Pacs at 8 to 12 foot intervals in infested areas. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mice activity cease to appear.

- Apply 2 to 10 Place Pacs (at intervals of 15 to 30 feet) per placement in infested areas. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease to appear.

**USE RESTRICTIONS:**

- See outer package label for inconsistent with its labeling.

**IF SWALLOWED:**

- Do not induce vomiting unless told to do so by the poison control center or doctor.

**IF IN EYES:**

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.

**IF INHALED:**

- Follow manufacturer's instruction for cleaning/maintaining PPE. If no such instructions for washables, wash hands with soap and water.

**IF ON SKIN:**

- Wash hands with soap and water.

**FIRST AID**

- Call a poison control center, doctor, or pharmacist for further treatment advice.

**FOLLOW-UP:**

- Replacement of contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and dispose of bait in an approved waste-disposal facility.

**DISPERSAL:**

- Do not expose children, pets, or nontarget animals to rodenticides. To help prevent feeding with first dead rodents appearing four or five days after feeding begins. Norway rats, roof rats, and house mice may consume a lethal dose in one night's feeding. Other animals such as pets, nontarget wildlife, and domestic animals may be poisoned if they eat rodenticides, carcasses or unused bait following application of this product.

**APPLICATION DIRECTIONS:**

- Do not apply further than 50 feet beyond the perimeter of the structure to be treated.

**WARRANTY:**

- Container Handling:
  - Dispose of material in an approved waste-disposal facility.
  - Do not contaminate water, food or feed by storage or disposal.

- Pesticide Storage:
  - Do not expose to heat, cold, or direct sunlight.
  - Store in a cool, dry place.

- Pesticide Disposal:
  - Do not contaminate water, food or feed by storage or disposal.

- Container Handling:
  - Dispose of material in an approved waste-disposal facility.
  - Do not contaminate water, food or feed by storage or disposal.

- Pesticide Storage:
  - Do not expose to heat, cold, or direct sunlight.

KILLS RATS & HOUSE MICE

Apply 4 to 16 Place Pacs (usually at intervals of 15 to 30 feet) per placement. Maintain an adequate bait supply to the site; do not allow baited areas to be used up. Replace contaminated or spoiled bait immediately. Using waterproof gloves, collect and place this material in the appropriate waste disposal system. Do not apply further than 50 feet from the property line.

SELECTION OF TREATMENT AREAS:

Determine areas where rats or mice will most likely find and feed with first dead rodents appearing four or five days after feeding begins. Protect bait from rain and snow. Remove as much alternative food as possible. Corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rains and snow. Remove as much alternative food as possible.

NOTE TO VETERINARIAN

If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

Anticoagulant Bromadiolone:

• If an animal dies, dispose of the body as per local regulations.
• Replace contaminated or spoiled bait immediately. Using waterproof gloves, collect and dispose of the material in the appropriate waste disposal system. Do not apply further than 50 feet from the property line.

CONTRAINDICATIONS:

This product is extremely toxic to fish, birds and other wildlife. Do not apply this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water line. This product is toxic to bees. Do not apply directly to water or to areas from which surface water is derived. Do not contaminate this product with household waste.

Pesticide Storage:

This product is toxic to livestock, pets, and non-target animals. Do not store in or near livestock, pets, or food or feed areas. Do not store in areas of production or in support areas of livestock or poultry production facilities. This product is not to be used on or in livestock. Do not store this product directly to water or to areas where surface water is present or to intertidal areas below the mean high water line.
