FLEE™ Plus IGR for Cats contains fipronil and (S)-methoprene, the active ingredients in FRONTLINE® Plus for Cats. Fipronil is fast-acting and long-lasting, providing control of fleas (all stages) and ticks (including those that may transmit Lyme disease). (S)-methoprene is developed for fast-acting and long-lasting control of flea eggs, flea larvae, and over 8 weeks of age cats and kittens. FLEE™ Plus IGR for Cats kills adult fleas for up to six weeks. Apply monthly to control ticks and chewing lice. FLEE™ Plus IGR for Cats remains effective even after bathing, water, and over 1.5 lbs. cats and kittens. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Use FLEE™ Plus IGR for Cats monthly for complete control of flea, tick, and chewing lice infestations. Studies show that using FLEE™ Plus IGR for Cats monthly can help break the flea life cycle and prevent flea infestations on your cat for up to 24 months.

**Directions for Use**

1. **How to Open:**
   - Remove tube from the package.
   - Separate one tube from the others.
   - Hold the tube with notches and slits pointing up and away from the face and body. Use scissors to cut off the narrow end at the notches along the line.

2. **How to Apply:**
   - Read the label completely and follow directions carefully. Do not use dog products on cats.
   - Do not treat with more than one pesticide product at a time.
   - Separate animals after treatment to avoid chance of ingestion.
   - Do NOT split tubes between pets.

3. **3 Month Tracker**
   - Use FLEE™ Plus IGR for Cats monthly for complete control of flea, tick, and chewing lice infestations.

4. **FREQUENCY OF APPLICATION**
   - Use FLEE™ Plus IGR for Cats monthly for complete control of flea, tick, and chewing lice infestations.
