To control General Household Pests indoors and around the exterior perimeter of residential, institutional, public, commercial, and industrial buildings.

EPA Reg. No. 8033-96-279
EPA Est. No. 279-NY-1
Active Ingredient: By Wt.
Acetamiprid .......................................................... 22.73 %
Bifenthrin* ............................................................ 27.27 %
Inert Ingredients: .............................................. 50.00 %
100.00%
* Cis isomers 97% minimum, trans isomers 3% maximum.

KEEP OUT OF REACH OF CHILDREN
CAUTION

FIRST AID

If swallowed
• Call poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If inhaled
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

If on skin or clothing
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If in eyes
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-(800)-331-3148 for Emergency Assistance.

NOTE TO PHYSICIAN

This product contains a pyrethroid. If large amounts have been ingested, the stomach and intestine should be evacuated. Treatment is symptomatic and supportive. Digestible fats, oils, or alcohol may increase absorption and so should be avoided. All treatments should be based on observed signs and symptoms of distress in the patient. Exposure to materials other than this product may have occurred.

For Information Regarding the Use of this Product Call 1-800-321-1FMC (1362).

PRECAUTIONARY STATEMENTS

Hazards to Humans (and Domestic Animals)

CAUTION

Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

All pesticide handlers (mixers, loaders and applicators) must wear long-sleeved shirt and long pants, socks, shoes and chemical-resistant gloves. After the product is diluted in accordance with label directions for use, and/or when mixing and loading using a closed spray tank transfer system (such as U-Turn®), or an in-line injector system, shirt, pants, socks, shoes and waterproof gloves are sufficient. In addition, all pesticide handlers must wear a respiratory protection device when working in a non-ventilated space. All pesticide handlers must wear protective eyewear when working in non-ventilated space.

Use one of the following NIOSH approved respirator with any R, P or HE filter or a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any R, P or HE prefilter.

When treating adjacent to an existing structure, the applicator must check the area to be treated, as well as immediately adjacent areas of the structure, for visible and accessible cracks and holes to prevent any leaks or significant exposures to persons occupying the structure. People present or residing in the structure during application must be advised to remove their pets and themselves from the structure if they see any signs of leakage. After application, the applicator is required to check for leaks. All leaks resulting in the deposition of termiticide in locations other than those prescribed on this label must be cleaned up prior to leaving the application site. Do not allow people or pets to contact contaminated areas or to reoccupy contaminated areas of the structure until the clean up is completed.
Environmental Hazards

This pesticide is extremely toxic to wildlife, fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and run-off from treated areas may be hazardous to aquatic organisms in neighboring areas. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops if bees are visiting the treatment area.

Physical and Chemical Hazards

Do not apply water-based dilutions of Transport GHP Insecticide to electrical conduits, motor housings, junction boxes, switch boxes or other electrical equipment because of possible shock hazard.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product can be used to control ants and a range of other general household pests outdoors around the exterior perimeter of buildings and structures.

Storage and Disposal

Pesticide Storage: Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Do not store at temperatures below 32°F (0°C). Rough handling may cause breakage, especially at low temperatures. Allow warming above 50°F (10°C) before use. Do not allow inner bags to become wet during storage. Do not handle inner bag with hands or wet gloves. Do not put contaminated or diluted material into food or drink containers. Do not contaminate other pesticides, fertilizers, water, food, or feed by storage or disposal.

In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Confine spills.

To Confine Spill: If liquid, dike surrounding area or absorb with sand, cat litter or commercial clay. If dry material, cover to prevent dispersal. Place damaged package in a holding container. Identify contents.

Pesticide Disposal: Pesticide wastes are toxic. Do not contaminate water, food or feed by storage or disposal. Improper disposal of excess pesticide, spray mixture, or rinsewater is a violation of Federal Law. Dispose of excess or waste pesticide by use according to label directions, or contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available or dispose of empty outer pouch in the trash as long as water soluble bags were intact.

Foam Applications

The Transport GHP Insecticide dilution may be converted to foam with expansion characteristics from 2 to 40 times for localized control or prevention of pests including ants, bees, wasps or other arthropods harboring in walls, under slabs or in other void areas.

Depending on the circumstances, foam applications may be used alone or in combination with liquid dilution applications. Applications may be made behind veneers, pier, chimney bases, or block voids or structural voids, under slabs, stoops, porches, or to the soil in crawlspace, and other similar voids.

Foam and liquid application must be consistent with volume and active ingredient instructions in order to insure proper application has been made. The volume and amount of active ingredient is essential to an effective treatment. At least 75% of the labeled liquid dilution volume of product must be applied, with the remaining percent delivered to appropriate areas using foam application. Refer to label and use recommendations of the foam manufacturer and the foaming equipment manufacturer.

Foam applications are generally a good supplement to liquid treatments in difficult areas, but may be used alone in difficult spots.

Use dry foam (20:1 or greater expansion ratio) for applications to wall voids and stud walls.

Use wet foam (5:1 or lower expansion ratio) for applications to soil, including applications to filled porches.

</table>

Application may be made using Transport GHP Insecticide foam alone or in combination with liquid dilution. The equivalent of at least 4 gallons of dilution per 10 linear feet (vertical barrier), or at least 1 gallon of dilution per 10 square feet (horizontal barrier) must be applied either as foam, dilution, or a combination of both.

[3 Gallons 10 Gallons]
Carpenter Ants

For best results, locate and treat ant nests. Apply Transport GHP Insecticide as a pinstream, spot, crack and crevice or perimeter treatment to ant trails around doors and windows and other places where ants have been observed or are expected to forage. Apply a perimeter treatment described in the General Household Pest Control - Outdoor section of this label. More frequent applications, may be necessary when treating concrete surfaces for ant control. Maximum control is generally achieved using the following procedure:

1) Treat non-porous surfaces with low volume applications using 0.11% dilution per 1,000 square feet.
2) Treat porous surfaces and vegetation with high volume applications using 0.11% dilution per 1,000 square feet.
3) Treat the trunks of trees that have carpenter ant trails or upon which carpenter ants are foraging using 0.11% dilution and applying this dilution to thoroughly wet the bark from the base of the tree to as high as possible on the trunk.

Ants (including Red Imported Fire Ants and Carpenter Ants)

Apply Transport GHP Insecticide as a pinstream, spot, crack and crevice or perimeter spray to carpenter ant trails around doors and windows and other places where carpenter ants have been observed or are expected to forage. For best results, locate and treat carpenter ant nests. Apply a perimeter treatment using either low or high volume applications described in the General Household Pest Control - Outdoor section of this label. The higher dilutions and/or application volumes, as well as more frequent applications, may be necessary when treating concrete surfaces for ant control. Maximum control is generally achieved using the following procedure:

1) Treat non-porous surfaces with low volume applications using 0.11% dilution per 1,000 square feet.
2) Treat porous surfaces and vegetation with high volume applications using 0.11% dilution per 1,000 square feet.

Underground Services

No mixing or shaking of liquid insecticide. Pint and quart containers may be used without dilution.

Apply Transport GHP Insecticide 0.11% dilution (see Dilution Chart) to the soil around the trees and other necessary areas.

For best results, apply in cool weather, such as in early morning or late evening hours, but not in the heat of the day.

Specific Pest Control Applications

Ant and Fire Ant Mounds

For best results, apply in cool weather, such as in early morning or late evening hours, but not in the heat of the day.

Carpenter Ants in trees, utility poles, fencing, deck materials and similar structural members

For best results, locate and treat ant nests. Apply Transport GHP Insecticide as a pinstream, spot, crack and crevice or perimeter treatment to ant trails around doors and windows and other places where ants have been observed or are expected to forage. Apply a perimeter treatment described in the General Household Pest Control - Outdoor section of this label. More frequent applications, may be necessary when treating concrete surfaces for ant control. Maximum control is generally achieved using the following procedure:

1) Treat non-porous surfaces with low volume applications using 0.11% dilution per 1,000 square feet.
2) Treat porous surfaces and vegetation with high volume applications using 0.11% dilution per 1,000 square feet.

Wood piles and stored lumber

Underground Services

No mixing or shaking of liquid insecticide. Pint and quart containers may be used without dilution.

### Crawling and Flying Insect Pests

To control Cockroaches, Crickets, Firebrats, Flies, Gnats, Midge, Moths, Scorpions, Silverfish, Spiders, apply as a coarse, low pressure spray to areas where these pests hide, such as baseboards, corners, storage areas, closets, around water pipes, doors and windows, attics and eaves, behind and under dishwashers, refrigerators, cabinets, sinks, furnaces, and stoves, the underside of shelves, drawers and similar areas. Pay particular attention to cracks and crevices.

Do not use in food/feed areas of food/feed handling establishments, restaurants, or other areas where food is commercially prepared or processed. Do not use in serving areas while food/feed is exposed or facility is in operation. Serving areas are areas where prepared foods are served, such as dining rooms, but excluding areas where food may be prepared or held. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed. Not for use in Federally inspected meat and poultry plants.

### Restricions

- Do not apply in a perimeter treatment to areas beyond 10 feet from the foundation of the structure.
- Do not use as a space spray.
- Do not use in and around the exterior perimeter of commercial barns, stables, paddocks. Do not use in grazing areas, feed lots or other similar areas used for housing, boarding, and/or rearing animals.
- Do not apply by air.
- Do not apply as a broadcast spray on lawns and turf.
- Do not apply in greenhouses or nurseries.
- Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes.
- Do not apply this product through any kind of irrigation system.
- Not for use on sod farm turf, golf course turf, or grass grown for seed.
- Do not apply to pets, crops, or sources of electricity.
- Do not treat electrically active underground services.
- Do not treat areas where food is exposed. Do not allow spray to contact food, foodstuffs, food contacting surfaces, food utensils or water supplies.
- Thoroughly wash dishes and food handling utensils with soap and water if they become contaminated by application of this product.
- Let surfaces dry before allowing people and pets to contact surfaces.
- Transport GHP Insecticide will not stain or damage any surface that water alone will not stain or damage.
- Application equipment that delivers low volume treatments, such as the Micro-Injector® or Actisol® applicators, may also be used to make crack and crevice, deep harborage, spot and general surface treatments of Transport GHP Insecticide.
- Wear protective clothing, unvented goggles, gloves and a respirator approved by NIOSH, when applying to overhead areas or in poorly ventilated or confined areas.

### Important

Transport GHP Insecticide may be applied as a spot or crack and crevice treatment in non-food storage warehouses and stores. Apply no more than 0.11% dilution (see Dilution Chart) of Transport GHP Insecticide per 1,000 square feet to provide adequate coverage. Apply to all areas that may harbor pests, including under and between pallets, bins and shelves. Do not apply direct to food grain bins (interior) or animals.

### Specific Indoor Pest Control Applications

#### Warehouses and Stores

Transport GHP Insecticide may be applied as a spot or crack and crevice treatment in non-food storage warehouses and stores. Apply no more than 0.11% dilution (see Dilution Chart) of Transport GHP Insecticide per 1,000 square feet to provide adequate coverage. Apply to all areas that may harbor pests, including under and between pallets, bins and shelves. Do not apply direct to food grain bins (interior) or animals.

#### Restrictions

- Do not apply in perimeter treatment to areas beyond 10 feet from the foundation of the structure.
- Do not use as a space spray.
- Do not use in and around the exterior perimeter of commercial barns, stables, paddocks. Do not use in grazing areas, feed lots or other similar areas used for housing, boarding, and/or rearing animals.
- Do not apply by air.
- Do not apply as a broadcast spray on lawns and turf.
- Do not apply in greenhouses or nurseries.
- Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes.
- Do not apply this product through any kind of irrigation system.
- Not for use on sod farm turf, golf course turf, or grass grown for seed.
- Do not apply to pets, crops, or sources of electricity.
- Do not treat electrically active underground services.
- Do not treat areas where food is exposed. Do not allow spray to contact food, foodstuffs, food contacting surfaces, food utensils or water supplies.
- Thoroughly wash dishes and food handling utensils with soap and water if they become contaminated by application of this product.
- Let surfaces dry before allowing people and pets to contact surfaces.
- Transport GHP Insecticide will not stain or damage any surface that water alone will not stain or damage.
- Application equipment that delivers low volume treatments, such as the Micro-Injector® or Actisol® applicators, may also be used to make crack and crevice, deep harborage, spot and general surface treatments of Transport GHP Insecticide.
- Wear protective clothing, unvented goggles, gloves and a respirator approved by NIOSH, when applying to overhead areas or in poorly ventilated or confined areas.

### Conditions of Sale of Warranty and Liability:

The Directions for Use of this product must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions beyond the control of FMC Corporation or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold FMC Corporation and Seller harmless for any claims relating to such factors.

Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the Directions for Use when used in accordance with the directions under normal conditions of use. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, FMC Corporation MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE, NOR ANY OTHER EXPRESS OR IMPLIED WARRANTIES WITH RESPECT TO THE SELECTION, PURCHASE, OR USE OF THIS PRODUCT TO THE EXTENT ALLOWED BY STATE LAW. Any warranties, express or implied, having been made are inapplicable if this product has been used contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foresee-able to (or beyond the control of) seller or FMC Corporation and buyer assumes the risk of any such use.

To the extent consistent with applicable law, FMC Corporation or seller shall not be liable for any incidental, consequential or special damages resulting from the use or handling of this product. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF FMC Corporation AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF FMC Corporation OR SELLER, THE REPLACEMENT OF THE PRODUCT.

This Conditions of Sale and Limitation of Warranty and Liability may not be amended by any oral or written agreement.

Transport & FMC - Trademarks of FMC Corporation
