

My name is Dennis Dominiack. I have been in the service business for the past 22 years. In our service business we deal with restaurants, bars, and other places of business where we come across bad drains (slow draining, odors from fats, oils, and grease, ect.)

We have tried and used several different products over the years in our drain line services that we offer. Nothing has worked long term, until we started using a product from Pure Drain DEFENDER. Previously, we would go into an account and pour down a few ounces of enzymes into their drains. This would give us limited and short term results. Now we can go in and treat drains with the Pure Drain DEFENDER while giving the customer a product that works 24 hours a day 7 days a week. These customers are seeing results in 4 to 5 days. What a benefit for my customers!

We are currently working with convenience stores, bars, and several microbreweries to solve their problems with cold water mold in and around the soda fountains. We have found that the Beverage Tray DEFENDER works extremely fast to solve this problem. It's a must Try!!!!
