You know how difficult it is to combat postemergence broadleaf weeds and sedges in warm-season turfgrass. Some products take weeks just to show any visible signs of activity. Others can cause injury to sensitive turfgrasses when applied in warmer weather.

Those days are over. As part of our ongoing commitment to customer-driven innovation, FMC developed Blindside® herbicide for turf professionals like you. Finally, there's a fast-acting, highly effective solution for challenging postemergence weeds that can be applied to virtually all types of warm-season turfgrass — even St. Augustinegrass. Blindside is also approved for use on Kentucky Bluegrass and Tall Fescue turfgrass, providing transition zone flexibility.

**BLINDSIDE® HERBICIDE**

**Launch a Surprise Attack Against Even the Toughest Weeds**

You know how difficult it is to combat postemergence broadleaf weeds and sedges in warm-season turfgrass. Some products take weeks just to show any visible signs of activity. Others can cause injury to sensitive turfgrasses when applied in warmer weather.

Those days are over. As part of our ongoing commitment to customer-driven innovation, FMC developed Blindside® herbicide for turf professionals like you. Finally, there's a fast-acting, highly effective solution for challenging postemergence weeds that can be applied to virtually all types of warm-season turfgrass — even St. Augustinegrass. Blindside is also approved for use on Kentucky Bluegrass and Tall Fescue turfgrass, providing transition zone flexibility.

**Weeds Won’t Know What Hit Them**

Dual-action Blindside herbicide works through both foliar contact and root uptake to deliver faster control of over 70 broadleaf weeds and sedges, including resilient species like dollarweed, doveweed and buttonweed. In fact, Blindside is proven to deliver visible signs of control within just one week, making it significantly faster than current competitive solutions. A follow-up application is permitted under extreme weed pressure.

**See for Yourself**

The doveweed images to the right demonstrate the type of dramatic results you can expect just days after a single treatment with Blindside.

**Blindside® Herbicide**

**EFFICACY AGAINST TARGET WEEDS**

As this data shows, Blindside delivers impressive results against even the most challenging and resilient postemergence weeds.
Protect Your Blindside

Blindside herbicide features a unique mode of action that works underground to stop the reproductive structures of target weeds from germinating. With this extended soil activity, you'll notice a significant reduction in future populations of weeds next season, saving you time and money.

Perfectly Balanced Control

While Blindside offers professionals the ultimate in speed, flexibility and efficacy for tough broadleaf weeds and sedges, it is also highly-selective and approved for use on most warm-season* and some cool-season turfgrasses. Blindside can even be applied in warmer temperatures without causing additional stress to turf.

Approved for use on:

- **WARM-SEASON**
  - St. Augustinegrass
  - Bermuda grass and hybrids
  - Centipedegrass
  - Zoysiagrass
  - Buffalograss

- **COOL-SEASON**
  - Kentucky Bluegrass
  - Tall Fescue

Blindside Earns Praise from the Pros

“Blindside smoked the dollarweed fast. It works on the leaves and the roots which is important with dollarweed because 90 percent of the plant is underground. You want to get the whole thing; otherwise it will just come back next season.”

Nick Bright, GOLF COURSE SUPERINTENDENT
MELROSE GOLF COURSE – DAFUSKIE ISLAND, SC

“We’ve struggled with doveweed for a while now, and other products labeled for it don’t do much. But we’ve had tremendous success with Blindside on doveweed with no damage issues in the summer months.”

Denise Wartan, GENERAL MANAGER
TRAD’S PEST CONTROL – JACKSONVILLE, FL

Simply Better

The dispersible granular formulation of Blindside herbicide is available in a convenient tip and measure package with a dosing chamber that accurately dispenses enough product to treat 1,000 square feet at both low and high application rates. This intelligent packaging minimizes the measurement and application errors common with some competitive products, keeping you both efficient and cost-effective. Each ½-lb package treats 40,000 to 80,000 square feet depending on the application rate.
