Launch A Surprise Attack Against Even The Toughest Weeds

- Blindside delivers:
  - Post-emergent control of broadleaf weeds—including tough weeds like dollarweed, doveweed, buttonweed, and wild violet—and perennial sedges like yellow nutsedge and green kyllinga
  - Fast-acting, visible results within a few days  
    ⇒ Celsius™ WG: Visible results and control may take several weeks
  - Approved for use on most warm season turf, including St. Augustinegrass, Bermudagrass, Centipedegrass, and Zoysiagrass. Also labeled for use on Kentucky Bluegrass & Tall Fescue for transition zone flexibility
  - A dual action, optimized combination of active ingredients that works through both foliar contact & root uptake
  - Protect your “blindside” next season through control of the underground reproductive structures for reduced weed populations in the future
