

PROFESSIONAL PEST MANAGEMENT

APPLY IN MORE PLACES. CONTROL MORE PESTS.

- ▶ Powered by two active ingredients, *lambda-cyhalothrin* and *thiamethoxam*
- ▶ Labeled for “cupboard to curb” control of more than 90 perimeter and turf pests
- ▶ Formulated with iCAP™ technology so microcaps of multiple sizes provide immediate and long-term control for up to four months
- ▶ Can be applied indoors, outdoors and in food-handling establishments, as directed by the product label

Control insects from cupboard to curb

Nuisance insects, such as ants, can make their home anywhere, including inside or outside of your customers' homes. To help you treat multiple areas for multiple pests, Syngenta developed Demand®Duo insecticide to give you one product with two modes of action.

Control of ants and other nuisance pests around structures¹

Better Control of Bed Bugs

Bed bugs are a growing threat that are difficult to control. The two active ingredients in Demand[®]Duo provide better control of bed bugs than either active ingredient alone². Additionally, Demand[®]Duo can be used as a spot, crack-and-crevice or void treatment to bed bug harborage areas such as headboards and baseboards.

The Power of iCAP technology

iCAP technology is a formulation innovation that is often copied but never duplicated. The formulation protects Demand[®]Duo against harsh weather conditions for more effective control. In addition, microcaps of multiple sizes provide immediate and residual control for up to four months.

The Demand[®]Duo formulation is made up of microcaps of different sizes to provide immediate and long-term control of pests.

Microcaps in the Demand[®]Duo formulation adhere to insects and are easily passed to other insects for thorough control.

Created so you can control more than 90 pests with one product.

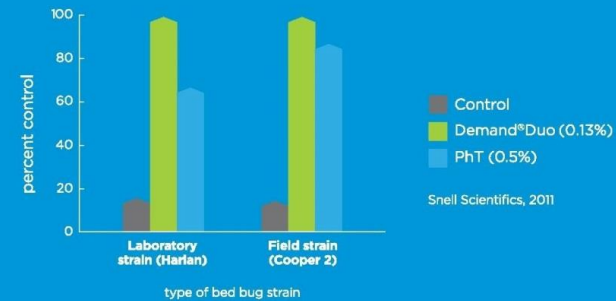

- ▶ Ants
- ▶ Bed Bugs
- ▶ Beetles
- ▶ Caterpillars
- ▶ Chinch Bugs
- ▶ Cockroaches
- ▶ Fleas & Ticks
- ▶ Flying insects
- ▶ Grubs
- ▶ Mites
- ▶ Mosquitoes
- ▶ Wasps
- ▶ Honeydew-producing insects
- ▶ Occasional invaders (spiders, crickets, grasshoppers, stink bugs)
- ▶ Wood-destroying insects (carpenter ants, carpenter bees, drywood termites)

See label for full list of pests controlled
